Together we fight against to covid-19.

Coronavirus disease 2019 (covid-19 or simply covid) is a contagious disease caused by severe acute respiratory syndrome coronavirus 2 (sars-cov-2). The first known case was identified in Wuhan, China, in December 2019. The disease has since spread worldwide, leading to an ongoing pandemic. Symptoms of covid 19 are variable, but often include fever cough, headache, fatigue, breathing difficulties, and loss of smell and taste. Symptoms may begin one to fourteen days after exposure to the virus. at least a third of people who are infected do not develop noticeable symptoms.
